Club Meeting Recap – June 17, 2026

The Dallas Radio Control Club convened for its latest meeting on June 17, 2026. The agenda kicked off with a motion to approve the previous meeting's minutes, which was quickly seconded and officially approved.

Meeting Attendance

Thank you to the following members and officers who were present to help guide our club's business:

- **Wes Lewis**
- **Richard Pence**
- **Jeff Dinius**
- **Eric Delano**

Treasurer's Report

Our club's finances are looking healthy as we head into the summer! The current breakdown is as follows:

- **Bank Account:** \$3825.18
- **PayPal:** \$377.24
- **Total Club Funds:** \$4202.42

Additionally, the club established a recurring monthly payment of \$40.00 to John Hughes to cover gas and maintenance for the mower. Keeping the grass cut is essential, and we appreciate the hard work!

Jet-Fly Event Retrospective (May 23rd)

A major focus of this month's meeting was an assessment and critique of the Jet-Fly event we hosted on May 23rd.

The Bottom Line

- **Attendance:** We had a solid guest turnout with 17 registered pilots.
- **Financials:** The event was a financial success, yielding a total profit of \$189.30.

What We Did Well

We discussed several highly successful elements from the fly-in that we absolutely want to keep doing for future events:

- The field was in absolutely great shape.
- The pit bossing was top-notch.
- Using lanyard tags for the pilots worked really well.
- The food was a hit—the burgers and hot dogs were tasty.

- The lunch intermission exhibitions went over extremely well, specifically the control line flight and the 3D flight demonstrations.
- The music provided an excellent atmosphere on the flight line.

Areas for Improvement

To ensure our events keep getting better, we also discussed things that did not go so well. Going forward, we plan to omit or completely revamp our approach to the judging and awards.

Looking Ahead

Next Meeting Highlight: Show and Tell!

For our next gathering, we want to see what is currently on your workbench or in your hangar.

Bring a show and tell aircraft you are building or flying! Whether it's a fresh scratch-build project, a recently completed kit, or an old reliable favorite, bring it out and share it with the club.

Future Events Planning

The floor was opened to discuss ideas for future events. The primary goal right now is to get an early start on our next major fly-in. We are currently tasking sponsors to work on getting a date set so we can start building out our calendar.

Following the open floor discussions, the meeting was officially adjourned. Keep your batteries charged, and we'll see you out at the field!
